

DACIMA™ Survey / ePRO

Web Surveys
ePRO
Patient diaries

Advanced web survey, ePRO & patient diary software

The Most Advanced web survey software

DACIMA Survey/ePRO is a powerful web survey, electronic Patient Reported Outcomes (ePRO) software that allows you to design simple or complex web surveys, ePRO forms and patient diaries through an easy to use web interface. No computer programming required!

DACIMA Survey has advanced design and configuration features allow you to create elegant survey designs. Built in features including respondent eligibility checks, data validation controls and form logic reduce errors and enhance your data quality.

DACIMA Survey/ePRO is Compliant with FDA regulatory requirement (21 CFR Part 11) making it ideal for Medical/Health survey, pharmaceutical, physician, patient surveys, ePRO and patient diaries.

DACIMA Survey/ePRO provides the tools you need to efficiently collect and manage your survey or any self completed data forms. It is the perfect solution for medical, pharmaceutical, population, business and customer surveys.

Benefits

DACIMA Survey/ePRO is ...

- 1- Easy to use with sophisticated web survey data collection, management and reporting features.
- 2- Flexible and powerful design capabilities that allow for rapid survey design and implementation.
- 3- Compliant with FDA 21 CFR Part 11 making it the best survey software for medical and health research.

DACIMA Survey/ePRO can ...

- 1- Improve data quality through advanced data validation features.
- 2- Create attractive surveys with customizable welcome screens, completion screens, email invitations and reminders.
- 3- Integrate images for data entry through the Dacima's unique image based data entry features which allow respondents click on zones on images to enter data.
- 4- Manage changes through the built in workflow and versioning.

DACIMA Survey/ePRO offers ...

- 1- Comprehensive training and user guides.
- 2- Technical support and rapid response time for peace of mind.
- 3- Secure data storage.
- 4- A user-friendly interface making it easy to setup your survey and collect data.
- 5- Different respondent invitation and access modes to maximize response rates (*personalized email invitations, general web link, username and password, or paper transcription*).
- 6- Status tracking, respondent management and reporting features simplifying survey management and improving efficiency.
- 7- Powerful and unique design features let you create panels, tables and sub forms to optimize your data entry process and create elegant data entry forms.
