

DACIMA™ AEFI

Adverse Events

Comprehensive AE Surveillance

Adverse Event Following Immunization Software

DACIMA's Adverse Event Following Immunization software (DACIMA™ AEFI) is a vaccine safety surveillance web application for post-marketing safety surveillance data collection.

DACIMA AEFI provides a user-friendly web platform for collecting managing and analyzing adverse event reports. The software includes standard data entry screens for collecting adverse event reports with the ability to easily customize the forms to meet your data collection requirements.

DACIMA's AEFI system includes powerful medical coding tools and integration with the MedDRA medical coding dictionary to simplify the coding process.

DACIMA's AEFI software also offers integration with the Automatic Brighton Collaboration (ABC) Tool (www.brightoncollaboration.org) which allows you to easily and rapidly confirm an AEFI diagnosis directly through DACIMA AEFI.

Benefits

DACIMA AEFI can...

- 1- Integrate with *MedDRA* for automatic medical coding.
- 2- Integrate with the *Brighton Collaboration's ABC tool* to facilitate diagnostic confirmation.

DACIMA AEFI has...

- 1- Standardized adverse event (AE) forms.
- 2- Customizable AE forms adapted to your data collection needs and requirements.
- 3- A user-friendly interface with data validation checks for efficient and accurate data collection.
- 4- Automatic email notification capability.

DACIMA AEFI offers...

- 1- Secure data storage.
- 2- An Economic and cost effective solution.
- 3- Efficient AE tracking and management with built in status tracking and reporting features.
- 4- Comprehensive training and user guides.
- 5- Personal training and support to insure you use the software to its full potential.

FEATURES

DACIMA AEFI is a powerful and innovative Adverse Event Following Immunization (AEFI) data management system that includes a wide variety of features and capabilities to facilitate accurate collection of AE data and efficient AE tracking and management.

Standard preconfigured Adverse Event forms

Multi-lingual interface

Medical Coding

Diagnostic confirmation tool (Brighton Collaboration)

Real-time data validation, conditional skips patterns and validation checks

Automatic email notifications

Dashboards, standard reports, ability to generate custom reports

Data extraction features and options

AE status tracking and management features

Electronic signatures

Built in data clarification forms and reports

Complete audit trail

Secure individual user access with customizable user roles

SSL protocol for secure data transmission

Application service: SaaS or customer hosted

SAS and SPSS code generator
